Exchange of Students with the USSR

3. This is controlled by Hartmann's department. Selected candidates must, however, also be approved by Dr. Steinmetz. The German students who spent the last academic year in the USSR returned to East Germany for their summer vacation in July.

Research at the Universities and Institutes of Technology

4. This is the responsibility of Prof. Kurt Freitag's department. Procedure is as follows:
- The university is informed how much may be spent in the next year on research, and is instructed to submit proposals.
  - The university submits its proposals, in triplicate, to the State Secretariat.
  - The State Secretariat studies the proposals, and forwards two copies to the Central Office for Research and Technology (Zentralamt fuer Forschung und Technik - ZAFZ).
  - ZAFZ notifies the State Secretariat which projects have been approved, and the latter notifies the university.
  - ZAFZ has occasionally suggested further research projects. Some of these, received from the Department for Scientific and Technical Cooperation of ZAFZ (Wissenschaftlich Technische Zusammenarbeit - WTL) appear to have been suggested on behalf of the USSR or other Eastern countries.
  - The scientific institutes must submit annual progress reports. Some projects, classified in the State Secretariat as important projects, must be reported on every three months. These reports are all in German. Reports on research covered by Allied Control Council Law 25 must be translated into Russian by the State Secretariat, and the translation passed on to ZAFZ.
5. The universities' proposals for research in 1964 have already been received and passed on to ZAFZ for consideration.
6. The State Secretariat exercises a purely administrative control over research at the universities. No serious attempt is made to check the scientific value of the research tasks and results; this would in any case be impossible with the present staff. It is believed that ZAFZ controls this side of the matter.
